

Ocius Xplorer - **Fast, reliable** and **advanced** - The only pre-certified Chip & PIN solution for the hospitality sector.

All hospitality environments focus on providing excellent customer service from the staff to the food and it shouldn't stop when it comes to taking payment. Ocius Xplorer from Commidea gives you that **customer service** flexibility by offering a Chip & PIN solution that is reliably, user-friendly and rich in functionality.

With the Ocius Xplorer being a **wireless** terminal, the **lightweight** and **stylish** solution can be taken anywhere in the hospitality environment to offer **'pay at table'** service. Not only this but it also offers the option of: -

- Gratuity
- Refunds
- Split bills
- Printed itemised bills via the terminal
- and much more

Ocius Xplorer

Hospitality

The Ocius Xplorer can be run in a **stand alone** or **fully integrated** environment and offers a cost-effective and viable route to **advanced Chip & PIN functionality**. Customers will appreciate its sleek lines, clear screen, speed of processing and ease at which the PIN code can be entered.

With Commidea's advanced Ocius software at the heart of the solution and the back-bone of Commidea's powerful ICP card payment processing solution, transactions are quickly authorised and processed ensuring a quick turnaround and **complete customer satisfaction**.

- Pre-certified for Chip & PIN by major UK banks
- Hand held device for mobile payment authorisation
- Rich in functionality and features such as 'pay at table' service.
- Capable of accepting both Chip & PIN and signature verification
- Utilises bluetooth wireless technology
- Authorisation in as little as 5 seconds
- 100% secure
- Centralised reporting and management information for multiple terminal users
- Technical support, seven days a week

Ocius Xplorer

The Ocius Xplorer is an **advanced wireless Chip & PIN solution** ideal for any hospitality environment from a multi-national chain to an independent restaurant or bar. The solution is pre-certified by all major UK Acquirers and requires no further bank testing before or after installation saving time and money.

Ocius Xplorer is one of the few Chip & PIN solutions on the market to offer complete **'pay at table'** functionality. The unique bill lodging system allows any member of staff to request a bill via any terminal at any table by simply searching and selecting the table number and the PoS will automatically send the full bill details to the terminal for payment via a bluetooth connection.

An itemised bill can be printed, presented to a customer and payment can be taken at the table. Ocius Xplorer also has specialist functionality to accept **split payments** should a table of customers wish to pay separately. Each completed transaction will update the PoS and Ocius Xplorer terminal until full payment is received. **Gratuity** can be added at any point during the payment process whether this be via each split payment or in total at the end.

At the heart of the Ocius Xplorer is the Ocius software - a highly advanced card payment processing solution developed in-house by Commidea. The Ocius software is the envy of the card payment processing market and the result of a huge amount of investment in time and money by Commidea. This **powerful** software encompassed in this stylish terminal will benefit any hospitality merchant and improve the efficiency of any card payment operation.

The modern, stylish and robust terminal is suitable for today's demanding hospitality environments and capable of processing a large amount of transactions reliably everyday. Customers will instantly appreciate the simplicity of the terminal from the clear message display to the ease of entering a PIN code.

To remove the IT implications of installing and maintaining card payment processing servers, the Ocius Xplorer can be used in conjunction with Commidea's Internet Card Payment solution, ICP. ICP is hosted and fully managed card payment processing solution that provides hospitality merchants with state of the art, fast and reliable processing for all major card types. The solution complies with all the latest security standards, is fully PCI DSS compliant and utilises X.25 lines for authorisation, the fastest high speed authorisation network available today. ICP is continuously monitored on site 24 hours a day, 7 days a week, 365 days a year by experienced systems teams to ensure the continuous processing of transactions.

To assist with the installation of the Ocius Xplorer, Commidea have a team of experienced implementation engineers that can either complete the implementation from start to finish or remotely support any installation. Should any hospitality merchant need assistance or support after the installation, Commidea have a large UK based technical support team to resolve any issues or answer any technical questions. To complete the cycle, Commidea have developed a web-based Management Information System to enable merchants to configure account information and access advanced reports online, anytime, anywhere.

Ocius Xplorer is one of the leading Chip & PIN solutions on the market today. To receive further information or a quotation, please email enquiries@commidea.com or telephone 08444 828 200 and speak to one of our sales representatives.
