Leisure Touch - Corporate

The complete Leisure & Fitness multi site estate management solution

- Know how your business is performing at any time of the day with your designer dashboard
- Use the membership status tool to see whether your clients are core members or likely to leave
- See which of your staff are performing
- Monitor sales performance against targets

LeisureTouch Corporate is a completely integrated, multi site touch screen based solution for Leisure and Sports Centres. Modules include admissions, memberships, booking, marketing, bars and catering. Corporate has been designed for use with multiple centres with all centres sharing a common database with price changes taking place centrally. The largest system currently installed has in excess of 65,000 members. Corporate has many unique features and is a true multi site, multi user and multi tasking product with many advanced features such as KPI's (Key Performance Indicators), full graphical analysis and a report generator.

KPI's & Dashboards

The purpose of Key Performance measurement is to drive future improvements in performance. KPI's are used to spot potential problems or opportunities. KPI's can be customised for each user's dashboard. For example a centre manager may have a headcount and usage based dashboard and the finance manager might have one showing cash taken so far that day.

Name	Last Attendance	Last Booked	User Code	Membership Exp	Sign Status	Status
[Image]	2012/01/12 12:11	2012/01/12 12:11	12345678	2012/01/12 12:11	[X]	Red
