

# KEEP YOUR SCREEN CLEAN

GOODBYE DIRT AND GERMS

**1**

## **SANITISE HANDS**

Use antibacterial disinfectant on your hands throughout the day, and wash frequently--lather for at least 20 seconds.

**2**

## **TURN SCREEN OFF**

A blank screen lets you see where all the smudges are.

**3**

## **WIPE CLEAN**

Use a soft, dry cloth to wipe away all smudges. Don't forget the corners.

**4**

## **USE POS FRIENDLY CLEANER**

Wipe the screen again using a POS friendly cleaner, such as screen wipes or ammonia-free glass cleaner. Don't squirt the liquid on the screen; use a small amount on the cloth.

**5**

## **REPEAT!**

This kind of deep clean should be done at least once per day.

**6**

## **BUSY? ON THE GO CLEAN**

Keeping the screen on (between customers), take your screen wipe or dry cloth and give the screen a good wipe, covering the whole surface.
